

IPv6 and Security Training

Salient Federal Solutions provides training and education to ensure your engineers, security professionals, and executives are equipped to support and secure next generation networks. We offer set courses and custom classes that address both government and corporate issues in such areas as IPv6 adoption, security, mobility, and more.

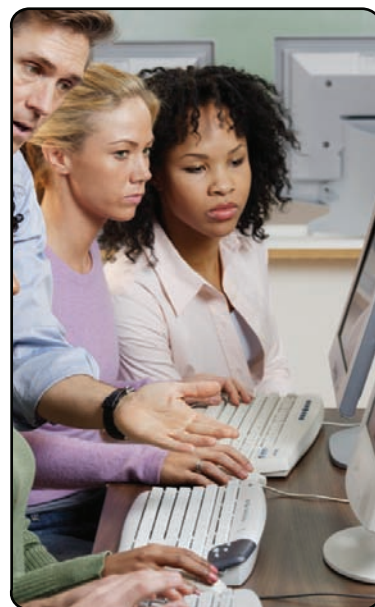

Our Classes

We offer comprehensive, hands-on courses that are suitable for all levels. Choose from our existing classes below or customize the program to meet your team's needs. Our instructors offer insight into the most up-to-date issues, challenges, and regulations in such courses as:

Building IPv6 Networks - This is an in-depth, 4-day course for network and system engineers, operations personnel, and help desk troubleshooters. Intended as a good first class for any IPv4-savvy IT person, it is hands-on, lab-heavy and covers all IPv6 fundamentals as well as network topics such as routing protocols, MPLS and core engineering, IPv4-IPv6 integration and transition, and advanced topics such as QoS, multicast, mobile IPv6 and more.

IPv6 Security Bootcamp - This 2-day advanced class is for architects, engineers and administrators of IPv6 security systems. This class assumes that students come with good prior knowledge of IPv6, and with knowledge and experience with IPv4-centric security solutions and strategies. The class includes an IPv6 security overview and primer, and detailed examination of threats, vulnerabilities and solutions for IPv6 security issues. This class uses in-depth instructor demonstrations to make the material compelling and easy to understand.

IPv6 Fundamentals + Security Bootcamp - This is a 4-day class for security personnel that combines a 2-day in-depth primer of the IPv6 protocol along with the IPv6 Security Bootcamp. The primer focuses on those elements of IPv6 that are of most concern to the security engineer and are needed to support the highly-detailed IPv6 security lessons of the second half of the class. This class combines hands-on, lab-heavy exercises on general IPv6 topics with security-centric IPv6 instructor demonstrations.

Our Instructors

Our world class educators are trained engineers with hands-on experience. They have worked in the public and private sectors and have provided training for many of the commercial service providers and several dozen civilian, Defense, and Intelligence government agencies.

About Salient Federal Solutions

Salient Federal Solutions is a leading provider of Federal IT and engineering solutions that enable government and industry to respond quickly to new or surge mission requirements with exactly the right people, skills, expertise and technical solutions. The company works to accelerate mission impact by delivering highly adaptable technology services, engineering solutions, and domain expertise that enable customers to rapidly meet the pressing requirements of today, while anticipating tomorrow's evolving challenges.

Salient takes a consultative approach to understanding your business and IT strategy to determine the best solutions fit. We offer cyber security and services in the areas of:

- ▶ Certification and Compliance
- ▶ Information Assurance
- ▶ Network Security Engineering
- ▶ Security Education and Training
- ▶ Systems Engineering
- ▶ Vulnerability Management

Prime Contract Vehicles

COMMITTS (NexGen)	GSA MOBIS 874 Schedule
Communications Electronics Command (CECOM)	GSA Information Technology SSS (ITSSS)
Design and Engineering Support Program (DESP II)	Program Management Support Services (PMSS)
DISA ENCORE II	Rapid Response (CR2)
Flexible Acquisition and Sustainment Tool (FAST)	SeaPort-e
GSA IT 70 Schedule	Space and Missile Defense Initiatives Support (SMDIS)
GSA PES 871 Schedule	USTRANSCOM

Key Clients

Business Transformation Agency (BTA)	United States Navy, US Marine Corps
Defense Information Systems Agency (DISA)	United States Transportation Command (USTRANSCOM)
Defense Threat Reduction Agency (DTRA)	
Department of Defense (DoD)	
General Services Administration (GSA)	Commercial
Jet Propulsion Laboratory (JPL/NASA)	Bell Mobility
Joint Task Force-Global Network Operations (JTF-GNO)	Comcast
Office of the Secretary of Defense (OSD)	Cox Communications
State of Florida Department of Transportation (FDOT)	Hydro One
Surface Deployment and Distribution Command (SDDC)	LifeSize, a division of Logitech
United States Air Force (USAF)	Rogers Communications
United States Army (Army)	Sprint/Nextel
